# KRISHNA SHIVHARE

Computer Science Engineer | Full-Stack Developer | Blockchain Enthusiast

Symbiosis Institute of Technology, Nagpur | Class of 2028 | krishnashivhare.dev@gmail.com | github.com/krishnashivhare | linkedin.com/in/krishnashivhare

## EDUCATION

### Symbiosis Institute of Technology, Nagpur

*Bachelor of Technology (B.Tech) - Computer Science and Engineering | Expected Graduation: 2028*

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Probability & Statistics, Web Technologies, Database Systems

## TECHNICAL SKILLS

**Programming:** Python, JavaScript ES6+, SQL
**Web Development:** HTML5, CSS3, DOM Manipulation, Responsive Design, JSON, LocalStorage, SessionStorage, Form Validation
**Blockchain:** Blockchain Architecture, Smart Contract Fundamentals, Cryptographic Hashing, Distributed Ledgers
**Core Concepts & Tools:** Data Structures & Algorithms, Object-Oriented Programming, Probability & Statistics, Git, GitHub, VS Code

## FEATURED PROJECTS

### Blockchain-Based Academic Credential Verification Engine | Python, Smart Contracts, Cryptographic Hashing, Web Integration

A decentralized credential verification prototype designed to issue, store, and audit academic credentials using cryptographic hashing and immutable ledger principles.

- Implemented tamper-evident academic credential verification mechanism with SHA-256 cryptographic hashing.
- Architected institutional administrative workflows for secure credential generation and issuance.
- Enabled rapid hash-based validity queries for employers and academic institutions without third-party reliance.

### Dynamic Client-Side Application Suite | JavaScript ES6+, HTML5, CSS3, Web Storage API

An interactive web application suite focused on persistent user preferences, responsive interfaces, and real-time form validation.

- Built persistent state management and dynamic theme switching utilizing LocalStorage and SessionStorage APIs.
- Implemented real-time event-driven form validation with immediate visual user feedback and error handling.
- Engineered dynamic timing and countdown utilities paired with clean, zero-dependency DOM manipulation.

## BEYOND THE CODE & ACTIVITIES

- Technical Participant & Hackathon Contributor at Symbiosis Institute of Technology, Nagpur.
- Active participation in algorithmic coding challenges and student hackathons.
- Collaborative software prototyping and version control adhering to Git-based workflows.
- Continuous self-directed exploration in modern web technologies and decentralized system architectures.
